

## Switch It Off

Switch it off, switch it off, switch it off  
Its your money that your wasting, switch it off.

More people are living everywhere,  
more harmful gases going into the air.  
The polar ice caps are starting to melt  
Take a shower not a bath, this will help.

Catch the bus, don't take the car  
These little changes will help by far.

Its your planet, you can choose,  
recycle your rubbish, refurbish or reuse.

These little steps, we can all take,  
to make our planet really great,  
so don't "waste" time, do your bit,  
the planets ours.

Look after it.
