

WARWICKSHIRE CLIMATE CHANGE PARTNERSHIP REVIEW 2010

VIEWS FROM THE QUESTIONNAIRES

What's is all about?

- General decline in satisfaction with Partnership (or Steering Group?) since 2008
- "Building Capacity" remains most important action for Partnership
- But approach has shifted from sponsoring/co-ordinating activity to influence through communications

What's useful about being involved?

- Exchanging information/hearing what others are doing
- Meeting other people with similar responsibilities/networking

What are the problems?

- Lack of connection to decision-making – making things happen
- Some missing aspects: community engagement, energy security, economic issues?

WHERE NOW?

- Link WCCP to decision-making: eg LSP structures? How would this be done?
- Accept WCCP role is to influence rather than act: how best to do this?
- Shift to "topic groups" (like Low Carbon Vehicles Forum)?
- Update Climate Change Strategy to improve understanding of priorities? Role of WCCP?
- Role of Warwickshire County Council in supporting WCCP? How else might it be supported?
