

Action Plan Objectives & Targets	Actions	2007 Target trend & progress (Steven Falk)	2007 Plan trend & progress (Steven Falk)	2008 Target trend and progress	2008 Plan trend & progress:
A. To maintain up-to-date listings of sites scarcer bumblebees in the sub-region 2002-2015	RM1 RM3 CP1 CP2	<p>↑ Target achieved.</p> <p>More or less achieved. More recent data needs collation.</p>	<p>↑</p> <p><b>We have more data and understanding than we used to have.</b></p> <p>There has been a dramatic upturn in the fortunes of <i>B.ruderatus</i> in Warwickshire but little evidence of an increase in <i>B.humilis</i>.</p> <p><b>The imminent loss of set-aside could have implications.</b></p>	<p>↑ Target achieved.</p> <p>Some monitoring in South Warks by Stretton-on-Fosse Parish group.</p>	<p>↑</p> <p><b><i>B.ruderatus</i> increasing with 10 sites now (up from 2) but <i>B.humilis</i> still at 2 sites only.</b></p>
B. To maintain the size and range of known populations of Warwickshire's scarcer bumblebees 2002-2015	PL1 PL2 PL3 SM1 SM2 SM4 A1 RM2 CP1 CP2	<p>↑ Some progress (on schedule)</p> <p>Appears to be working for <i>B.ruderatus</i> through agri-environment schemes but not much evidence for <i>B.humilis</i></p>	<p>↑</p> <p><b>We have more data and understanding than we used to have.</b></p> <p>There has been a dramatic upturn in the fortunes of <i>B.ruderatus</i> in Warwickshire but little evidence of an increase in <i>B.humilis</i>.</p> <p><b>The imminent loss of set-aside could have implications.</b></p>	<p>↑ Some progress (on schedule)</p> <p>The designation of qualifying sites as SINC's or SSSI's is still in progress.</p> <p>Agri-environment options are still in use but set-aside has gone.</p> <p>The work being done by Butterfly Conservation will benefit bumblebees.</p>	<p>↑</p> <p><b><i>B.ruderatus</i> increasing with 10 sites now (up from 2) but <i>B.humilis</i> still at 2 sites only.</b></p>

<p>C. To increase the size and range of scarce bumblebee populations, by doubling number of sites By 2010</p>	<p>SM3 SM4 A1 RM2 CP2</p>	<p><b>↑ Some progress (on schedule)</b></p> <p>Succeeded for <i>B.ruderatus</i>, and we conclude that some of this is a result of climate change because it has happened fast.</p>		<p><b>↑ Target exceeded for 1 species</b></p> <p>10 sites now for <i>B.ruderatus</i> including Hill Close Gardens, Warwick.</p> <p>The work being done by Butterfly Conservation will benefit bumblebees.</p>	
<p>D. To raise awareness of rare bumblebees , their life cycles and habitat requirements 2002-2015</p>	<p>RM3 CP1</p>	<p><b>↑ Target achieved</b></p> <p>Much achieved, helped by much national profile-raising.</p>		<p><b>↑ Target achieved</b></p> <p>Ongoing with an article by Steven Falk in WWT magazine Spring 2008.</p>
