

OBJECTIVES	Target	Progress with Targets (based on progress with actions reported between 2005-7)	Target Progress	Progress Summary	Plan Progress	HBA status *
A. To identify the more ecologically important parks and open spaces and their ownership	By 2007	Some progress (behind schedule) The majority of parks have been identified but monitoring is behind schedule.	↔	There is good coverage of biodiversity issues within the sub-region's parks. Biodiversity conscience is continuing to grow. Some targets are "achieved" but one or two "not started".	↑	No data
. To maximise our knowledge of such sites and ensure they are appropriately designated (e.g. SINC, TPO, Conservation Areas)	By 2007	Some progress (on schedule) SINC process is underway with the majority of pSINCs in parks being surveyed	↑			
C. To maintain and enhance the extent and quality of semi-natural habitats in and around parks and public open spaces with priority given to those holding UK BAP Priority Species, Red Data Book species, Nationally Scarce and Regionally Scarce species	Ongoing	Some progress (on schedule) Solihull, Rugby, Warwick and Nuneaton & Bedworth are known to positively consider ecological issues in parks. Stratford and North Warwickshire is believed to be positive.	↑			
D. To promote good management practice in parks and public open spaces which will maximise their wildlife value without compromising safety, and to share knowledge through the development of a network of regular communication between landowners and practitioners	2007	Some progress (behind schedule) Various councils have promoted wildlife value through the Green Flag awards and have interpretation relating to biodiversity in parks. Could be more widely promoted with more inclusion in Park Strategies.	↔			
E. To encourage local communities to undertake local action which enhances the contribution of parks and public open spaces to biodiversity	Ongoing	Target achieved. Achieved through the parish BAP and Big Tree Hunt; events and talks have continued to occur throughout the region.	↑
