“Choosing to Change” Structured Day Programme

An abstinence focussed, 12 week rolling modular structured groupwork programme. The groupwork includes relapse prevention, life and social skills (including assertiveness, emotion management and cognitive skills), change management and access to through and aftercare support.

Triage and Comprehensive Assessments

We offer these assessments at all sites..

Structured Intervention Service (SIS)

50 minutes at various locations. Starts with an assessment, and then up to 12 sessions to look at drug related issues. We hold a number of places for women, relatives and carers.

Acupuncture

Auricular (ear) acupuncture which can help to relax and detox, and helps to reduce cravings.

Brief Interventions

One-to-one sessions once a week for up to 50 minutes at various locations. Up to 4 sessions to look at current drug related issues.

Drop-In

Come along for help and support, we also provide needle exchange and acupuncture.

Needle Exchange

We operate a needle exchange service, also offering harm reduction and use management advice.

Health Checks

Carried out by a Qualified Healthcare Professional

Cranstoun
drug services

Cranstoun Drug Services is a non profit, independent, registered charity, providing a range of specialist treatment and rehabilitation services in the community and in residential centres, based on the cycle of change with the aim of reducing the impact and harm caused by drug use to individuals and communities.

While Cranstoun does not promote any single approach to drug treatment, services are linked into the Bio Psychosocial Model and a care management approach. Our services encompass abstinence; harm reduction approaches and access services, with interventions based upon individually assessed need. As a fundamental principle we aim to ensure our services are accessible, relevant and appropriate to all people of all sections of society. To this end we take special account of groups who face discrimination and are under represented in terms of traditional drug service delivery.
