

Appendix E

Next Steps – Five Year Implementation Plan

The next key stages for the Warwickshire Authorities is to take steps to implement the Waste Strategy and put in place short and long-term plans to ensure that our targets and objectives are met.

The following table provides a summary five year plan, which highlights the key actions which we need to take to implement the Strategy.

The Warwickshire authorities will work together and will adopt the following principles:

- Appropriate costs of meeting the aspirations in the Waste Strategy will be shared between the District Councils and the County Council.
- The proposed enhanced targets of 40-45% are progressive, countywide targets, to be reached over a number of years.
- We will keep the public and stakeholders 'in the loop' and ensure that they are aware of our proposals and how we aim to implement them.

A Multi-representative Project Board has been established to drive forward the procurement of treatment facilities required to implement part of the Waste Strategy.

Action	2005/2006	2006/2007	2007/2008	2008/2009	2009/2010
Land search for possible treatment facility locations					
Start procurement process for treatment facilities					
Potentially increase coverage of green waste collection schemes in North Warwickshire and Warwick Districts					
Potentially increase coverage of kerbside collection scheme for dry recyclables – North Warwickshire Borough Council					
Collection authorities consider the separate collection of biowaste					
Redevelopment of Hunters Lane Household Waste Recycling Centre					
Commence public education/information campaign					
Development of waste prevention and minimisation strategy					
Planning and development for In-vessel composting facilities					
Procurement process for waste treatment facility					
Ongoing public education/information campaign					
Redevelopment of Grendon Household Waste Recycling Centre					
Warwick District Council and Stratford on Avon District Council – consideration of joint contract					
Redevelopment of Cherry Orchard Household Waste Recycling Centre					
Redevelopment of Princes Drive Household Waste Recycling Centre					
Critical review point & scheduled review of Waste Strategy					
Participating districts – kerbside collection of biowaste operational					
In- vessel composting facilities operational					
Critical review point – first EU Landfill Tax Directive Target Year – maximum BMW to landfill 113,495					
Development of waste treatment facility					
Achievement of 40-45% recycling and composting rate
