

**Warwickshire Climate Change Partnership Review 2008**

**Building the Basis for the Future**

**Partnership Satisfaction Questionnaire**

Knowledge about climate change and related issues has moved on since the launch of the Warwickshire Climate Change Strategy in 2006. The Partnership currently serves two main purposes: 1. allowing engagement with the many stakeholder groups in the county, and 2. extending our resources and reach in terms of influence and what we can achieve. It's time to consider what the Partnership is delivering and what you now consider is important. Even if you've not been involved since the beginning, please provide us with feedback by filling in this questionnaire. Its aim is to find out:

- ❖ What you originally hoped the Warwickshire Climate Change Partnership might achieve.
- ❖ Whether it has met your expectations. If not why not,
- ❖ How the Partnership can best help individual Partners, and
- ❖ How it can be maintained and made more effective.

**Please indicate in the boxes on the left hand side which five of the following actions you consider are the most important for the Warwickshire Climate Change Partnership to deliver. Rank these from 5 (most important) to 1 (least important). You can use 'Other' to add your own suggestions.**

Rank (5 best)	<b>Build capacity</b> by sharing good practice across all Partners, identifying training needs, identifying potential partners for mentoring schemes and providing the opportunity to pass on experience
	<b>Increase efficiency</b> by pulling together overlapping work and joint funding so that limited resources can be used more effectively.
	<b>Facilitate communication</b> by providing a forum for information dissemination, discussion and debate and through stakeholder events.
	<b>Ensure coordination</b> of actions to ensure actions are joined up and cross-cutting.
	<b>Prioritise action</b> by identifying and addressing issues that are most relevant to Partners.
	<b>Influence and inform policy</b> by bridging the gap between climate science and policy needs.
	<b>Establish benchmarks or standards</b> , including developing an action and emissions monitoring and reporting system.
	<b>Secure funding</b> including exploring European sources.
	<b>Gain 'ownership'</b> of issues surrounding climate change in the County of Warwickshire through increasing the number of Partners.
	<b>Other?</b>

Warwickshire **Climate Change Partnership**

**1. What is the reason you are involved or interested in the Warwickshire Climate Change Partnership? What did you hope to get from it?**

---

---

**2. What have you learned / do you value from being involved in it?**

---

---
